

Sustainability - Mediation

Next week our school will host a group of young people from the catholic church in Mainz. They will build up a huge tent to conduct workshops concerning sustainability, environmentalism, societal justice and so on.

Task 1: Writing a Mediation (Sept 5)

Read the given material on moodle. Write an email (about 150 words) to an English-speaking friend, in which you tell him what you expect from this programme. Tell him also, which topics you would like to discuss in the workshops.

Task 2: Meet in your discussion group (Sept 5)

In their brochure, the organisers provide the following definition of sustainability:

“Die Bedürfnisse der Gegenwart befriedigen, ohne zu riskieren, dass künftige Generationen ihre eigenen Bedürfnisse nicht befriedigen können.”

Make a list of your needs. Discuss in your group, whether you satisfy your needs in a sustainable way. What needs to be done, to be more sustainable?

Task 3: Writing a Report (Sept 9)

On Tuesday we will do a workshop with the Weltverändern-team in German. Write a report (about 250 words) about the workshop. Practise reported speech by using at least three quotes from the workshop. The quotes can be from the workshop leader or a classmate.

Upload your report on moodle.
